PROFILE SUMMARY

Innovative Full-Stack Software Developer with 13 years of experience in developing secure and scalable web based systems across FinTech, GIS and other sectors. Expert in Python (Django), C# (.NET), and PL/SQL, with a proven track record of developing solutions that eliminated 100% of manual processing. Demonstrated success in leading cross-functional teams to execute complex projects, leveraging data-driven insights to drive business growth effectively.

TECHNICAL SKILLS

Programming & Scripting: Python, C#, JavaScript, SQL, PL/SQL

Frontend: React (TypeScript), MUI, React Router, React Hook Form, Axios, Responsive UI Design

Backend & APIs: Django, DRF, Flask, ASP.NET Core, REST API, FastAPI, GraphQL, JWT, OTP-based SMS/Email and Payment Gateway integration, Business logic implementation

Databases: PostgreSQL (incl. PostGIS), MS SQL Server, Oracle, MySQL

GIS: Web GIS, Spatial data modeling, Geospatial analysis, Map-based visualization, Coordinate systems & projections, Land parcel (Mouza/Plot) data handling, ArcGIS/GeoServer Integration

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Git, GitHub, CI/CD pipelines, Linux

Data Analytics & Visualization: Pandas, NumPy, Power BI, Oracle BI, Jupyter Notebook

AI Tools: Cursor, Claude, GitHub Copilot

Practices: Agile/Scrum, TDD, Code Reviews, Clean Architecture, Microservices concepts

EXPERIENCE

QualFix LLC, Remote - Senior Data and Development Manager

JANUARY 2025 - DECEMBER 2025

- Led and hands-on built 2 production-grade full-stack web applications using React, Django, and PostgreSQL, owning architecture, API design, data modeling, and performance optimization.
- Designed backend-driven scoring and decision engines, integrated secure document workflows, payments, notifications, and role-based dashboards, reduced manual effort by ~60–70%.
- Engineered secure, scalable systems with sub-1s API responses and 99.9% transaction success using JWT/RBAC, async processing, rate limiting, audit logs, and monitoring.

Pubali Bank PLC, Dhaka - Senior Officer (Data Analyst / Software Developer)

FEBRUARY 2023 - DECEMBER 2024

- Developed and maintained 4 core banking systems within the CBS framework using C# and Oracle, ensuring optimal system performance and operational stability.
- Designed and integrated REST APIs in collaboration with 3+ cross-functional teams, and automated transaction processing using PL/SQL, eliminating 100% manual execution.
- Owned database design and analytics, building complex SQL-based reports and data visualizations that improved decision-making and contributed to a ~2% increase in profit.

Mouza and Plot based National digital land zoning project, Ministry of Land, Dhaka - Consultant (Data Analyst / Programmer)

APRIL 2021 - FEBRUARY 2023

- Led a 5-member development team to design and deliver a GIS-based national land zoning web application at the Mouza/Plot level, architected to handle government-scale spatial data and high-stakes decision-making for the entire country.
- Designed and optimized enterprise database architecture, producing 10+ management reports through complex SQL, including tables, views, functions, stored procedures, and triggers.
- Pioneered data insights through automation by building 3 interactive Power BI dashboards and a custom Python-based web scraper (BeautifulSoup, Selenium) to harvest and analyze spatial and operational data.

Institute of Water Modelling (IWM), Dhaka - Junior Database / Software Analyst

APRIL 2013 - APRIL 2021

- Designed, developed, and implemented 3 web portals, 1 ERP solution and 5 Web GIS applications by ensuring business requirements, scalability and performance, and increased the annual turnover of the company by 5%.
- Built 20+ complex SQL-based reporting and BI dashboards (included maps, graphs, charts, tables and other filters) enabling data-driven decision-making for management and stakeholders.

EDUCATION

- **Bangladesh University of Engineering and Technology (BUET), Dhaka** - *PhD in Data Science*, APRIL 2024 - Ongoing | Part-Time
- **Military Institute of Science and Technology (MIST), Dhaka** - *M.Sc. in Computer Science and Engineering*, JULY 2024
- **Military Institute of Science and Technology (MIST), Dhaka** - *B.Sc. in Computer Science and Engineering*, JANUARY 2013

SELECTED PROJECTS

Registration Management System (FullStack: React (TypeScript), REST API, Django, PostgreSQL)

- Built a production-ready workflow automation platform using React (TypeScript), Django, and PostgreSQL that eliminated manual data entry bottlenecks through RBAC-enforced approval workflows, audit logging, and automated reporting (Excel/PDF exports), reducing processing time by 70%.
- Single-handedly executed complete SDLC from requirements gathering to production deployment, including database design, RESTful API development, responsive UI implementation, security hardening (HTTPS, input sanitization), VPS configuration (Nginx, Unicorn, SSL), and ongoing maintenance with zero downtime.

Loan Pre-Approval System (Full-Stack: React (TypeScript), REST API, Django, PostgreSQL)

- Developed a secure loan pre-approval system with customer and bank-official portals, supporting JWT authentication, mobile/email verification, multi-tenant roles, application tracking, and status workflows (Review, Pre-Approve, Reject).
- Built an automated customer rating and document validation engine, using OCR (Tesseract) and rule-based checks to assess completeness, authenticity, and financial stability.
- Delivered scalable, API-driven features including dynamic document requirements, secure uploads, audit-ready histories, optimized for performance, security, and enterprise reliability.

Think Climate BD (React, OpenLayers, REST API, Django, PostgreSQL, PostGIS, GeoServer)

- Developed a production-ready GIS decision-support platform covering Bangladesh's Division → District → Upazila hierarchy with dynamic WFS boundary rendering, cascading filters, hazard overlays, and cyclone shelter mapping with detailed facility metadata for disaster preparedness.
- Executed end-to-end SDLC including GeoDjango spatial modeling (MultiPolygonField), optimized REST APIs, CQL-filtered GeoServer integration, interactive React SPA with modal analytics, and performance-tuned, secure deployment architecture for scalable disaster risk intelligence.

Centralized Standing Instruction Execution System (PL/SQL, Oracle 19c)

- Architected a high-throughput standing instruction automation engine processing 10K+ daily transactions across 500+ branches, automating 80+ core banking rules (debit/credit postings, penalty calculations, orchestration) and eliminating 100% manual intervention while improving accuracy, compliance, and auditability on Oracle 19c.

Digital Memo Numbering System (Full-Stack: AngularJS, C#, ASP.NET MVC, MS SQL Server)

Vision transformer-based deep learning techniques for improper face mask-wearing detection

- Developed and benchmarked a Vision Transformer (ViT)-based deep learning model for improper face mask detection, achieving 97% accuracy and outperforming CNN architectures (ResNet-50, VGG16, MobileNetV2, Inception, Xception) using Python, TensorFlow, PyTorch, and Kaggle | [IEEE Link](#)

PROFESSIONAL CERTIFICATIONS

- **Oracle Certified Professional** (Oracle Cloud Infrastructure 2023 Certified Data Science Professional) recognized by Oracle Corporation as Oracle Certified, Sept 2023 | [Link](#)
- **Power BI for Beginners** organized by Simplilearn, June 2022 (Certificate code: 3513614)
- **Post Graduate Diploma (PGD) in Islamic Banking and Finance (IBF)**, Academy of Business Professionals (ABP), January, 2024 – November 2024
